What are ACURATE/TRUE individual averages:

The league determines individual stats using the common denominator of "season" games, not "player" games played. There must be a common denominator for each player - which, logically, is the total SCHEDULED games for all players.

Your "actual/personal average" is also shown (in blue).

EVERYONE MUST PLAY 70% OF THEIR GAMES!
You must play 70% of your games in order for <u>you</u> or <u>your team</u> to win money.
70% of the SEASON = 25 out of 36 games per person.
You <u>cannot</u> miss more than 11 of your games (2 1/2 nights of play)
